About Authors

Carlos Acosta received a BA degree in cultural anthropology from the University of California (UC) Santa Barbara in 1982. From 2001 to 2009 he worked as an Employment Counselor for the Private Industry Council in San Luis Obispo, California. In that capacity he helped administer a US government federal job retraining program that enabled disenfranchised workers to find new occupations. From 2010 to the present he has been employed by the US government in its Social Security Administration. He has had a long standing interest in the evolution of conscious thought and developed his own ideas on the subject. Carlos Acosta is a member of the Association for the Scientific Study of Consciousness.
Address: Dr. Carlos Acosta, PO Box 267, Nipomo CA 93444, USA; email: carlosacosta.new@gmail.com

Jason W. Brown received his MD at the University of Southern California at Los Angeles, USA, in 1963. His postdoctoral affiliations include the University of California, Los Angeles (1964–1967) and the Boston University Medical Center (1969–1970). Since 1972 he is clinical professor for neurology at the New York University Medical Center. In 1979 he founded the Institute for Research in Behavioral Neuroscience, which he has been directing since then. In addition, he is the founder of the Center for Cognition and Communication, providing rehabilitation and support service for neurologically impaired patients. His interests beyond medicine focus on process philosophy (Whitehead) and the relation between the mental and the physical.
Address: Prof. Dr. Jason W. Brown, 66 East 79th Street, New York, NY 10021, USA; email: drjbrown@hotmail.com

Jamie Carnie is an independent scholar of philosophy, and a software engineer. Since studying philosophy at Bristol at MLitt level in 1982 his research activities have centred on objectivism and the evolution of language. He is the author of “Blue Sky Thoughts: Colour, Consciousness and Reality”.
Address: Jamie Carnie, 17 Pulteney Grove, Bath, BA2 4HQ, United Kingdom; email: jamiecarnie@onetel.com

Joël Dolbeault studied history of philosophy and philosophy of sciences at the University of Paris-Sorbonne, and received a PhD at the University of Lille in 2010 for a thesis on Bergson and physics. He teaches philosophy at high school. His main areas of interest are philosophy of mind and philosophy of sciences.
Address: Dr. Joël Dolbeault, 24 boulevard Souchet, 93160 Noisy-le-Grand, France; email: joel.dolbeault@free.fr

Georg Franck studied philosophy, architecture, and economy at the University of Munich and received his PhD in economy in 1974. Subsequently he worked as an independent architect at Munich and developed software for urban planning. Since 1994 he holds the chair of digital methods in architecture and planning at the Vienna University of Technology. His interests and activities cover applied research in architecture (artificial intelligence, computer-aided design and manufacturing, geographic information systems), topics of cultural philosophy (information society, cultural economics), natural philosophy, and the philosophy of time. His most recent books are “The Economy of Attention” and “Mental Capitalism”.

Address: Prof. Dr. Georg Franck, Institute of Architectural Sciences, Vienna University of Technology, Treitelstrasse 3, 1040 Vienna, Austria; email: franck@iemar.tuwien.ac.at
